

Official representative of:

Mexican companies with more than 20 years of experience, representatives of important technology brands for the industry, helping to improve processes and quality in the most demanding production lines that demand efficiency and productivity with machinery and components recognized in the market.

Critical machinery and components for your manufacturing processes.

Millions of dollars in savings with our high quality and reliable machinery.

Our services:

Projects.

Development of high quality engineering.

Maintenance.

We design programs and policies according to specific processes.

Spare parts.

Stock of spare parts on demand.

Equipment repair.

Fast, clear and accurate response to reduce line stoppages.

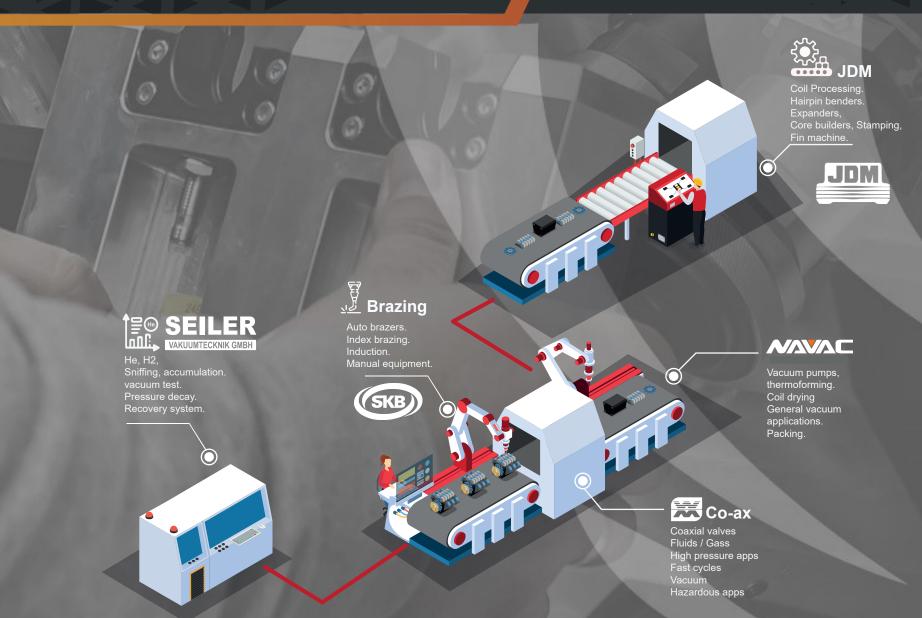

Sale of machinery/equipment.

Experts in the industrial field who provide solutions to customers.

JDM presses are high-speed.

Precision automated equipment dedicated to the manufacture of HVAC components.

- Stamping presses.
- HVAC heat exchange equipment.
- Microchannel heat exchange equipment.
- Tube processing equipment.

They can manufacture small parts such as condenser fins and air conditioning evaporators, as well as perform high-productivity activities such as expansion, flaring, and bending of edges in short cycles.

SK Brazing has achieved a breakthrough in automatic and manual brazing, as a result of more than 35 years of efforts to find ways to innovate existing brazing concepts.

- Gas flame brazing machines.
- ◆ Resistance brazing machines.
- Ultrasonic brazing machines.
- Induction brazing machines.
- ◆ Laser brazing machines.
- Other brazing machines.

One of best brazing engineering companies in the world specializing in brazing automation and manual.

We have been on the market for over 35 years providing high end Leak detection machinery all over the world with more than 1200 machines sold in the HVAC, Electrical and Automotive Industry.

Test of evaporators, condensers, coils, fluid lines, gas tanks, compressors, expansion valves and any part that must be gas-fluid tight are in our scope and product portfolio.

Custom made Helium Testers

We have a extensive experience in developing solutions and special product machinery for all kind of test parts, pressures from 0 Bar to 500 bar leak rates from 5E-7 mbarL/s up to 20 sccm, handling the technical implications that not everybody can achieve.

The "Cobots" are Collaborative robots that are space friendly, safe, and flexible to implement. Collaborative robots - or cobots - are making automation easier, from large corporations and even for small and mid-sized companies in different applications and processes.

Tightening solutions:

- · Screw, bolt, assembly
- Reduction of ergonomic risk, human hazardous operations.
- Client current technology/tools integration into our stations if required.

Brazing solutions:

- Llama con gas/acetileno Oxígeno / aire.
- · Inducción soldadura fuerte para Cu, Al, SS, Etc.
- Optimización de los ritmos de producción.

HE, H2, Refrigerant Sniffing

- Aumento de la calidad mediante la reducción de los errores de base humana.
- Integración flexible con o sin sistemas de visión.
- Ocupa poco espacio en la planta de producción.

Con Robots colaborativos o COBOTS, estamos haciendo la automatización mucho más sencilla, tanto para grandes corporaciones como para empresas pequeñas-medianas en distintas aplicaciones.

Co-ax valves have become the First choice of various segments Industrial.

Coaxial valve technology for businesses.

- Control.
- Repeatability
- Durability.
- Reliability.

Valves in extremely difficult conditions.

Industrial vacuum solutions and systems. HVAC/R.

The integrated pump and motor design makes it lighter and smaller.

The design of multiple changes of the

 ballast expense, allows to satisfy the demand in the final vacuum and the capacity of evacuation of steam.

The sealing parts are made of fluorinated

 rubber, which prevents corrosion and oil leakage.

The perfect solution for great results.

VAT vacuum valves high-performance components for vacuum-assisted processes with special requirements on precision, durability and ultra-clean vacuum.

- Vacuum Control Valves.
- Vacuum Isolation Valves.
- Vacuum Gate Valves.
- Vacuum Angle / Inline / Cylinder Valves.
- Vacuum Butterfly Valves.
- Vacuum Pendulum Valves.
- Pressure Relief / Venting Valves.
- Gas Dosing Valves.
- 3 Position Vacuum Valves.
- Vacuum Check Valves.
- Vacuum All-Metal Valves.
- Vacuum Transfer Valves.
- Vacuum Transfer Doors.
- Vacuum Multi-Valve Units.

We look forward to offering you an optimal solution.
